ABOUT

I am a student via the University of Arizona – Coding Bootcamp. With a specific focus in Full-Stack Web Development. I'm on track to graduate in February of 2021. In my short time, I have gained technical skills and understanding of multiple programming languages, libraries, frameworks, and interfaces. I am passionate about problem-solving and developing solutions.

EXPERIENCE

CLINICAL LABORATORY COORDINATOR:

Donor Network of Arizona, Phoenix, AZ / Jan 2019 – Present

- Maintain and build relationships with our supply inventory vendors. Facilitate and adhere to all clinical audits in accordance with AATB, OSHA, EBAA, FDA regulations and internal policies.

TISSUE RECOVERY COORDINATOR:

Donor Network of Arizona, Phoenix, AZ / Jan 2018 – Present

- Team Leader within the Tissue Recovery Services Department. I managed a small team of three to four individuals to carry out the surgical procurement of human tissue for transplant.

PROJECTS

WEATHER APP:

Weather App Repo

Using the [Open Weather API](#) users can search any city and get current weather, and a 5-day forecast. Saves search history and upon refresh, shows the last searched city.

CALENDAR APP:

Calendar App Repo

A simple daily planner designed for an 8-hour workday that uses local storage and saves the users input for each hour. Color coded to signify previous, current, and future time slots.

COMIC CLASH:

Comic Clash Repo

Collaborative project between three classmates and myself. Our goal was to compare Marvel superheroes and their given attributes/powers using multiple third-party APIs.
