## Technologies and Languages

- Languages: HTML5, CSS, JavaScript, jQuery
- Technologies: MySQL, NoSQL, Sequelize ORM, MongoDB, Git, Node.js, Express.js, Heroku, GitHub, VS Code
- Other: RESTful APIs, JSON, AJAX, CRUD Operations, Agile software development, Scrum

## Projects

- [Quizzical - GitHub Repo](#)**: Collaborative project where our goal was to create a full-stack web application that allows users to create quizzes, take quizzes, and track user progress for each quiz.
- [Burger Express Logger - GitHub Repo](#)**: Using node.js, express-handlebars, and MySQL – this application lets users input a burger they want to eat, then choose if they want to eat it or not!
- [MySQL Employee Tracker - GitHub Repo](#)**: CLI application that allows a user to manage their business. Users can add/view/remove departments, roles, and employees.

## Education and Certifications

- Full-Stack Web Development**, University of Arizona. **Aug. 2020 – Feb. 2021**
