ABOUT

I am a student via the University of Arizona – Coding Bootcamp. With a specific focus in Full-Stack Web Development. I'm on track to graduate in February of 2021. In my short time, I have gained technical skills and understanding of multiple programming languages, libraries, frameworks, and interfaces. I am passionate about problem-solving and developing solutions.

Experience

Technical Skills

- HTML5
- CSS
- BOOTSTRAP
- MATERIALIZE
- GIT
- VS CODE
- JAVASCRIPT
- JSON
- jQUERY
- AJAX
- NODE.JS

Soft Skills

- COMMUNICATION
- PROBLEM SOLVING
- TIME MANAGEMENT
- TEAM-ORIENTED

Jan. 2019 – Present

CLINICAL LABORATORY COORDINATOR *Donor Network of Arizona*

Maintain and build relationships with supply inventory vendors. Facilitate and adhere to all clinical audits in accordance with AATB, OSHA, EBAA, FDA regulations and internal policies. Coordinate, train, and lead clinical staff in environmental monitoring and testing of all clinical areas. Organize and manage the equipment program and supply inventory for Tissue Recovery operations. Onboard and train all incoming non-clinical staff within the Tissue Recovery Services Department.

Jan. 2018 – Jan. 2019

TISSUE RECOVERY COORDINATOR *Donor Network of Arizona*

Team Leader within the Tissue Recovery Services Department. I managed a small team of three to four individuals to carry out the surgical procurement of human tissue for transplant.

Feb. 2016 – Jan. 2018

TISSUE RECOVERY TECHNICIAN *Donor Network of Arizona*

Assisted the Team Leader with the procurement of human tissue for transplant, while adhering to all regulatory standards. Maintained cleanliness, sterilization, and readiness of all surgical instruments.

Education

Aug. 2020 – Feb. 2021

Full-Stack Web Development

University of Arizona: Coding Bootcamp

Project: Weather App

Weather App: Using the Open Weather API, users can search any city and get current weather, and a 5-day forecast. Saves search history and upon refresh, shows the last search city.

GitHub Repo

Project: Calendar App

Calendar App: A simple daily planner designed for an 8-hour workday. Uses local storage and saves the user input for each hour. Color coded to signify previous, current, and future time slots.

GitHub Repo

Project: Comic Clash

Collaborative project between three classmates and myself. Our goal was to create an application utilizing multiple third-party APIs in order to compare Marvel superheroes against each other.
